

Lean 200: Applying the Fundamentals

Lean 200 is a two-day course focusing on the fundamental Lean principles used by successful organizations. You will be led through an interactive simulation of process that allows for hands-on practice with Lean tools and methodology. Upon successful completion of Lean 200, you will have the knowledge to apply Lean techniques in your own organization, across a variety of settings, giving you more time to focus on perfecting the customer experience.

Learning Objectives

- Understand how Lean methods may be applied to your organization using recent examples from key clients
- Describe the five lean principles and their applications
- Develop an easy-to-use strategy to apply the tools in your organizations
- Promote learning and sharing of best practices between participants
- Understand Voice of Customer (VOC)

About Lean Thinking

The Lean philosophy is a fundamental change in how the people in your organization think and approach problems. It is a common set of beliefs and principles that focus on what is of value in every facet of your organization. When rigorously applied throughout an entire organization, Lean can have positive impacts on productivity, cost, quality and delivery of services.

We Can Help.

-  Advanced Manufacturing & Technology Deployment
-  Business Growth, Innovation & Marketing
